- * Less than half the price of the least expensive devices
- * Conversion device will not chamber live ammunition
- * Can be deployed virtually anywhere
- * Safe for use with live role players
- * IDENTICAL feel and function to operational devices
- * Impressive report without the danger of an operational device
- * Approximately 160dB
- * 100% replacement guarantee in the unlikely event of a dud
- * Reloadable immediately after firing due to low heat generatio
- * Conversion kits available for all popular diversionary devices

NOTE: This device is for **TRAINING PURPOSES ONLY** and is not to be used operationally

Conversion Device

This training device permits safe, inexpensive Flashbang training. The Conversion Kit screws into the reloadable grenades such as Def-Tec 25 or the UPCO 1750. Single use grenades such as the Nico and CTS are easily retrofitted to accept the conversion kit after they have been fired. Dedicated training bodies are also available.

Reloads have the same sound level as a robust blank (approximately 160 dB). Safe to use in almost any setting and in situations where live role players are being used. (Hearing and eye protection mandatory)

Reload - Actual Size

Kit includes:

- Reusable Adaptor Sleeve
- Yellow Spoon
- Yellow Pin
- Reusable Yellow Firing Head
- Knock-out Rod
